

Prasol Chemicals Limited

Energy Policy

Prasol Chemical Limited is committed to being an energy-conscious organization that actively contributes to the conservation of natural resources and the sustainable development of the planet. Through the implementation of the ISO 50001:2018 Energy Management System (EnMS), we strive to continuously enhance our energy performance across all operations.

Our Commitments

In accordance with ISO 50001:2018, Prasol Chemical's energy policy is established by top management and is aligned with the purpose and strategic direction of the organization. This policy:

a) **Supports Organizational Purpose**

Reflects our commitment to sustainable and responsible manufacturing practices that align with our environmental goals and business objectives.

b) **Provides a Framework for Objectives and Targets**

Establishes a foundation for setting and reviewing measurable energy objectives and targets that drive continual energy performance improvements.

c) **Ensures Availability of Resources**

Commits to ensuring the availability of necessary resources, information, and support to achieve the established energy objectives and targets.

d) **Compliance with Legal and Other Requirements**

Ensures compliance with applicable legal requirements and other obligations related to energy efficiency, energy use, and energy consumption.

e) **Continual Improvement**

Promotes continual improvement of energy performance and the effectiveness of the EnMS.

f) **Procurement of Energy-Efficient Products and Services**

Supports procurement practices that prioritize energy-efficient products and services, considering life cycle costs and long-term performance.

g) **Supports Energy-Conscious Design**

Encourages design and modification of facilities, equipment, and processes that contribute to improved energy performance.

Energy Management Objectives

To support this policy, Prasol Chemical aims to:

- Reduce energy consumption while maintaining or improving productivity, quality, and safety.
- Implement energy-efficient technologies and services.
- Conduct regular energy audits, reviews, and management programs to identify improvement opportunities.
- Enhance the use of renewable energy resources where feasible.
- Create awareness and provide training to all employees on energy conservation.
- Encourage active participation of all employees in achieving energy performance objectives.
- Consider energy efficiency and life cycle costs during procurement and process changes.

Policy Management

- This policy shall be maintained as documented information and communicated across all levels of the organization.
- It shall be made available to relevant interested parties, as appropriate.
- The policy shall be reviewed periodically and updated as necessary to ensure ongoing relevance and effectiveness.

Shri. Gaurang N. Parikh

Managing Director
